

Exhibit at ASGCT's Spotlight on Immuno-Oncology

ABOUT

The Spotlight on Immuno-Oncology conference aims to transcend the basics of cell therapy and CAR-T cells to dig deeper into gene engineering and the intersection of gene and cell therapy in this space. This conference will encourage dialogue and spark breakthroughs in immuno-oncology.

Speakers will focus on a variety of topics, including: novel CAR designs and approaches beyond B-Cell malignancies, genome and epigenome editing, and direct in vivo delivery for cancer immunotherapy.

DETAILS

When: Tuesday August 1
Pacific Time Zone 8:00 AM - 5:00 PM

Wednesday, August 2
